PROJECTS

Doctor-Plus The main objective of Doctor Plus is to provide quality medical care to patients by bringing all Doctors of the country to a single platform so that everyone can easily access them and make online appointments. The other objective is to replace the current manual file keeping system with a digital and an online medical patient database system.

The system is base on Laravel and Flutter Framework.

<https://www.doctorplus.io>

State Builder The objective of this project is to facilitate the reporting and management of the state builder team during the Afghanistan election.

the system is web-based and made with the Codeigniter framework. the system has 7 user types and covers all branches of the state builder team in Afghanistan.

<https://www.statebuilder.af>

Bawar Force the objective of this project is to facilitate the people during the **COVID-19**, our system help to find doner and volunteer and provide people of Afghanistan Medical Care, Public Awareness, Food, and Protection.

<https://www.bawarforce.org>

Handicraft Market (Ecommerce) the objective of this project is for facilitating the handicraft market of Afghanistan. we focus on how to introduce and sell the afghan handicraft in the online market.
